BROWN SUGAR™
Distortion

Thank you for purchasing the Rockbox™ Brown Sugar™ Distortion. The Brown Sugar™ is inspired by one of the most sought-after tones for decades: the sound of a cranked vintage British non-master volume amp. Whether recorded on classic albums or played on tour by legendary hard rock bands, the raw power of plugging straight into a full stack and turning it all the way up has transformed blues and rock music forever. Guitar players have long tried exotic pickups and modifications to their amplifiers to achieve this special sound with different equipment and at more practical volumes. The Brown Sugar™ is designed to get close enough to those classic rhythm crunch and stinging lead sounds that you can feel it when you play, featuring four controls that interact together for organic, amp-like tones with sustain and presence. This is a true-bypass pedal. The circuit is bypassed and the signal passes directly from input to output when the pedal is switched off.

Note: This pedal is capable of producing a lot of gain! It is possible to send your amp into oscillation, blow speakers, etc. with some settings. Be sure to lower the gain on the pedal AND your amp before connection.

Level - Sets the overall volume. Use this to match volume or give a boosted output when the pedal is selected.

Drive - Sets the amount of distortion.

Tone - Use the tone control to set the amount of bass, mids and treble heard from the pedal when the pedal is selected.

Contour - Interactive with the tone control to select the high, low, and mid frequencies being adjusted by the tone control.

A/C Adapter - Uses standard 2.1 x 5.5mm **Center Negative Polarity** 9v adapter, such as a Boss. Using an A/C Adapter bypasses the supplied internal 9V battery. Be sure to check the internal battery regularly for leakage.

WARNING! SUPPLYING IMPROPER VOLTAGE OR POLARITY CAN DAMAGE THE UNIT!

DAMAGE TO UNIT DUE TO IMPROPER POWER SUPPLY IS NOT COVERED UNDER WARRANTY!

This product is warrantied against manufacturers defects in workmanship and materials to the original purchaser for a period of two years from the date of purchase. Failure due to the following will void the warranty: Rockbox is not responsible for failure due to modifications, abuse, incorrect power supply or repairs done by others. Warranty repairs are performed at Rockbox. Purchaser is responsible for shipping charges to Rockbox. Rockbox will repair or replace at its discretion.
